

BP6211B

Fast Turn-Off Synchronous Rectifier for CCM/DCM Flyback Converter

Description

The BP6211B is a high-performance, high-integration, self-biased synchronous rectifier (SR) with a 60 V MOSFET integrated for flyback converters. It can replace the secondary diode rectifier for higher efficiency and power density.

The BP6211B supports discontinuous conduction mode (DCM), quasi-resonant (QR) and continuous conduction mode (CCM) operations. Robust operation in CCM is enabled with adaptive gate drive and faster turn-off speed with 4 A sink current and ultra-short turn-off delay.

The internal ringing detection circuitry prevents the IC from falsely turning on during DCM or QR operations. The internal turn-on blanking function prevents an accidental turn-off due to parasitic ringing. Ultra-short turn-on delay increases SR MOSFET conduction time to improve efficiency.

The BP6211B generates its own supply voltage without requiring auxiliary winding for low-side or high-side rectification. This feature makes it suitable for charger applications with a very low output voltage or wide output voltage range.

The BP6211B is available in an SOP-8 package.

Features

Integrated 60 V / 14 m MOSFET

Adaptive gate drive and faster turn-off speed

Supports DCM, QR and CCM operations

Ringing detection prevents false turn-on in DCM

Supports low-side and high-side rectification

Self-biased and no need for auxiliary winding for high-side rectification

Supports wide output voltage range down to $0\,\mathrm{V}$ 4 A sink gate driver prevent false turn-on by the miller effect

Ultra-short turn-on delay, increase conduction time, optimize efficiency Low quiescent current

Compatible with energy efficiency regulations P-8 Package

Applications

QC, USB-PD and PPS AC-DC Chargers
High Efficiency Adaptors
High Efficiency and Power Density Flyback
Converters

Typical Application

Ordering Information

| Part Number | Package | Packing | Marking |
|-------------|---------|-------------------------------|-------------------------------|
| BP6211B | SOP-8 | Tape & Reel 4,000 pcs/Reel | BP6211B XXXXXYY ZZZZWWX |

Pin Configuration and Marking Information

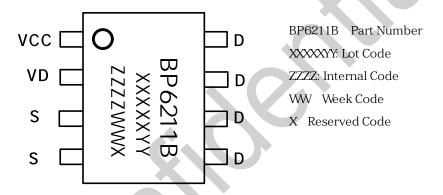

Figure 2. SOP-8 Pin Configuration

Pin Functions

| Pin NO. | Pin Name | Description |
|---------|----------|--|
| 1 | VCC | Linear regulator output. VCC is the supply of the BP6211B. |
| 2 | VD | MOSFET drain voltage sensing. VD is also used as the linear regulator input. |
| 3 4 | S | MOSFET source. S is also used as a reference for VCC. |
| 5 6 7 8 | D | MOSFET drain. |
